4/5/2013 17:48:29	Jonas Helming	2		0 Low	2	2	1	2
4/9/2013 9:20:34	Stefan Rieger (TWT)	1	The document is comprehensive and covers a variety of currently used description languages, development methods and tools. The tables with the evaluation of different languages/methods/tools with regard to different criteria are certainly useful. However, in some parts the document is still incomplete. The descriptions of many languages in Chapter 3 and tools in Chapter 5 are missing.	1 High	1	1	1	1
4/12/2013 21:14:38	Marc Behrens	2		0 Low	1	2	1	2
4/22/2013 10:07:57	Cecile Braunstein	1	The document is still in a preliminary form. The document focus on formal methods, and I miss more details on support tools such as requirement tracing, team organization and versionning. These are considered as criteria and such kind of tools are not explicitly covered.	1 High	2	1	1	0
